Rebecca Rosco graduated December 11, 2009 with a Bachelor of Science in Geology with a minor in Geography. Rebecca attended Texas A&M University Kingsville in 2004 after graduating from Woodland Park High School in Colorado. She came to the University with an interest in gemology but towards completion of her B.S., she was more interested in economic geology and glacial geology. While attending the University, Rebecca taught geoscience laboratories almost every semester, took the position as treasurer and secretary for a couple semesters in the Geology Club. In the summer of 2007, Rebecca received an internship with the Cripple Creek and Victor Gold Mine in Colorado.

That following summer and Fall 2008 semester Rebecca and team members participated in a Microcopy Research Project (with Orlando Gonzales and Jacob Hundl) in a study of the paragenesis of veins within the Cripple Creek/Victor District. She presented her research at the Pathways to the Doctorate Research Symposium in Fall, 2008. During the spring semester Rebecca received a scholarship from the Corpus Christi Geological Society. She was working in an open pit hard rock mining environment. Most of the duties involved logging rock chip samples and planning drill holes. She also leads a field trip in the summer of 2009 with the Alaska Geological and Geophysical Survey in Fairbanks, Alaska. There she received experience in ArcGIS, and great contacts with the State Survey and USGS. Rebecca is currently employed as a Geologist.
