Subject (

Learning Objective

Content Review

Students should

All of the planets in our solar system orbit around the Sun.
Planets that orbit around other stars are called exoplanets.
The Milky Way is the galaxy that includes our Solar System.

1. Which is denser, Sun or Blackhole?
2. Can a Neutrino pass through a dense planet like Pluto?
3. Does a planet show up on a X-Ray?

New Content

Where most Neutrinos come from.
How scientists locate Blackholes.

Explain what a Neutrino is.
Explain how Scientists study and find blackholes.

Assessment

Students will be asked to complete a quick evaluation after the workshop so we can continue to improve our services.
